

**New V-Series
of machines!**

New Major Technological Developments

Introducing our new V-Series suite of ultra-precision machines. Our latest generation of subnanometer systems with several NEW innovations!

Impact Resistant Porous Graphite Spindle

10K rpm air bearing main work spindle. Still the best air bearing spindle available and now with the proven added benefits of porous graphite.

Windows 7 based Interactive HMI

22" wide triple screen touch/swipe gesture interactive control system. Featuring Delta Tau 64 bit Power PMAC for superior processing speeds & unmatched ease of use over any previous systems in the ultra-precision industry.

Industry Leading 8 Picometer

feedback resolution combined with the new control system offers several technological valued added benefits to our customers.

Universal Compact Utilities Cabinet

combines electrical, hydraulic, and pneumatic systems all into one space saving certified unit.
