Nanotech Receives Prestigious Company of the Year Award...

Moore Nanotech was honoured at State level by receiving the prestigious **2008 Company of the Year** award from the New Hampshire Department of Economic Development. The award was formally presented at its 13th annual economic development summit on December 2nd, 2008. Commissioner George Bald lauded Moore Nanotech for its innovative spirit which has made it the fastest growing company in the precision machining field - stating that "high tech manufacturing is the backbone of our state's economy and Moore Nanotech is at the forefront of companies that are creating products and processes that are changing the world."

Receiving the award: Mr. Len Chaloux - President and Co-founder of Moore Nanotechnology Systems and Commissioner Bald

Nanotech Diversifies its Product Offering in 2009...

By any measure, the rise of Moore Nanotechnology Systems to its position as a global leader in its field is incredible. More than any single thing, we attribute our success to our highly skilled and diversified workforce that share a passion and common vision for excellence. We will remain focused on the continuous development of new products and value-added services to meet our current and future customer requirements and drive to achieve 100% customer satisfaction in everything that we do. We welcome the opportunity to work with you to satisfy your requirements for advanced ultra-precision manufacturing systems.

In addition to continuous product enhancements and new features added to our existing product line, we will launch two new products in 2009 including a **Glass Press Molding Machine** for hot pressing of precision glass lenses and an **Ultra-Precision Flycutter** for processing plano optics.

New State-of-the-Art Facility Under Construction...

In line with Moore Nanotech's long term strategic growth objectives, work has commenced on the construction of a purpose built 36,000 ft² facility in the town of Swanzey, on the outskirts of Keene, NH. The facility will effectively double the existing floor-space and will yield clear improvements in operating efficiency, while providing an environment conducive to both the demands of its customer base and employees alike.

The project is testimony to the success of Nanotech to date and its commitment to future growth. Completion of the new facility is scheduled for the Summer/Fall period of 2009.
